Profile

I have completed B.Tech  Computer Science at MGM's Jawaharlal Nehru Engineering College, Aurangabad. I am keenly interested in learning new technologies and utilizing my skills to solve real-life problems and contribute towards the growth of the particular organization.

Professional Experience

Web developer

2023/08 – present | Aurangabad, India

SDLC Corp

-Contributed significantly to the development of an efficient admin portal, implementing user-friendly interfaces and functionalities. Employed agile methodologies and collaborated within a team to ensure timely project delivery and adherence to best practices. Acquired hands-on experience in database management, backend development, and frontend design, emphasizing responsiveness and seamless user experience.

- 13 months completed (6 months internship)

Full stack intern

2023/02 – 2023/07 | Aurangabad, India

Skillhub It Soution

I am excited to embark on an offline internship as a React developer with SKILLHUB IT Solutions. This esteemed organization offers valuable opportunities for web development interns like myself to gain hands-on experience and expand our skill sets. I am grateful to have been selected for this esteemed internship program.

web developer intern

2022/01 – 2022/02

Graduate Rotational Internship Program

I am thrilled to be selected as a web development intern in the prestigious online internship program offered by Sparks Foundation. This program provides valuable opportunities to students and recent graduates in various fields, allowing them to gain practical experience and enhance their skills

Skills

C Language	HTML	CSS	Bootstrap
ES6	Javascript	React.js	Redux
Node.js	Express.js	MongoDB	Material UI
Ant Design	Semantic UI	Data Structure	Git
Github	Jenkins		

Education

B.Tech

2019/08 – 2023/06

M.G.M.'s Jawaharlal Nehru Engineering College, Aurangabad

Certificates

- Full-Stack Web Development with React 
- Google IT Support 

Projects

Patang (Transworld) RPA Admin Panel

Description: Designed and developed an AI-driven admin panel using MERN stack, leveraging AI to automate tasks and increase efficiency. Successfully reduced manual workload from 30 people to 1 person, achieving significant time savings and productivity gains.

Key Achievements:

- Implemented AI solutions to automate tasks, resulting in substantial time and resource savings
- Developed a scalable and efficient admin panel using MERN stack
- Improved team productivity and workflow through AI-driven automation

Mawarid Admin Panel

Description: Streamlined and automated the Mawarid Admin Panel by integrating AI-powered data matching and payment processing. Successfully converted manual tasks into automatic processes, increasing efficiency and reducing processing time.

Key Achievements:

- Automated data matching between internal data and invoiced data using AI algorithms
- Implemented automatic payment processing for parties, eliminating manual intervention
- Increased processing speed and efficiency, resulting in significant time and resource savings
- Improved accuracy and reduced errors through automated data matching and payment processing
- Data integration and processing
- Automation and workflow optimization.
